Setting goals has two valuable assets – a sense of originality and a stepping stone to illuminate the path. Goals put one at the helm of life; pursuing them acknowledges a better future situation. They help to steer a course of life rather than simply drifting along and letting things happen.

Setting goals may appear easy, but, for some, it is quite challenging. Fear of failure may be avoided in the absence of any goals. After all, one has to decide what one wants to achieve in the end. To accomplish goals, experts recommend a five step approach.

Smart goals are a methodology of thinking that helps people reach success. SMART stands for specific, measurable, achievable, realistic, and time-bound.

#### O Captain ! My Captain !

O Captain! My Captain! our fearful trip is done;  
The ship has weather'd every rack, the prize we sought is won;  
The port is near, the bells I hear, the people all exulting,  
While follow eyes the steady keel, the vessel grim and daring:  
But O heart! heart! heart!  
O the bleeding drops of red,  
Where on the deck my Captain lies,  
Fallen cold and dead.

O Captain! My Captain! rise up and hear the bells;  
Rise up – for you the flag is flung – for you the bugle trills;  
For you bouquets and ribbon'd wreaths – for you the shores

a-crowding;  
 For you they call, the swaying mass, their eager faces turning;  
 Here Captain! dear father!  
 This arm beneath your head;  
 It is some dream that on the deck,  
 You've fallen cold and dead.  
 My Captain does not answer, his lips are pale and still;  
 My father does not feel my arm, he has no pulse nor will;  
 The ship is anchor'd safe and sound, its voyage closed and done;  
 From fearful trip, the victor ship, comes in with object won;  
 Exult, O shores, and ring, O bells!  
 But I, with mournful tread,  
 Walk the deck my Captain lies,  
 Fallen cold and dead.

-Walt Whitman

**A1) Fill in the blanks:** 2

- (i) You should not mug up content without \_\_\_\_\_.
- (ii) Stress is compared to a \_\_\_\_\_.

A little stress can be a good thing: it can be the motivational push that we need to get things done. However sometimes, dealing with stress especially during exam season can be a difficult thing to do. There are several factors that give rise to stress as exams approach. If one is not well-prepared with the content, he may feel anxious. Mugging up content without understanding is not the right way; you tend to forget what you have not understood. Unfounded anxiety can also lead to stress. For example, a candidate starts thinking, “What if I do not pass ....?” And the imaginary consequences of possible failure lead to stress. Stress is like a black dog. It will not allow you to sleep, to eat, or to study in peace.

Eating well, taking meals at fixed times, taking some time off, getting enough sleep and some meditation daily can help to ward off stress at the time of exams. Train yourself to keep your head cool, plan your studies, study with your friends occasionally, and take regular exercise. Study subjects thoroughly and you will automatically gain confidence.

One has to give so many exams in life at almost every step. Then face them as they come. Why should you be afraid of them?

The ancient Greeks believed that Volcanic eruptions occurred when Vulcan, the God of the Underworld, stoked the island off Sicily, from which the present word volcano is derived. Of course, we no longer believe this is true.

There are three types of volcanoes active, dormant, and extinct. Volcanoes are said to be active when they frequently erupt within recent times. Those that have been known to erupt and show signs of possible eruption in the future are described as dormant. Volcanoes that have not erupted at all in historic times are called extinct volcanoes. All volcanoes pass through active, dormant, and extinct stages but we never know. Mount Vesuvius and Mount Krakatoa were once thought by people to be extinct and yet both erupted most violently.
